## DOINGWHATW?RKS

## **Screening Tools Chart**

National Center on Response to Intervention: American Institutes for Research (AIR), Washington, DC

Topic: Response to Intervention in Elementary-Middle Math

This chart from the National Center on Response to Intervention (NCRTI) guides educators and families in selecting screening tools that best meet their individual needs. The Center's Technical Review Committee on Screening independently established criteria for evaluating scientific rigor and rated each tool based on classification accuracy, generalizability, reliability, validity, disaggregated data for diverse populations, and efficiency.

To access the chart's interactive features, a glossary of terms, and additional screening resources, visit the NCRTI website at http://www.rti4success.org/chart/screeningTools/screeningtoolschart.html.

This project has been funded at least in part with Federal funds from the U.S. Department of Education under contract number ED-PEP-11-C-0068. The content of this publication does not necessarily reflect the views or policies of the U.S. Department of Education nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

Screening Tools Chart: Updated: November 30, 2009

The tools chart below reflects the results of the second annual review of screening tools by the <u>Center's Technical Review Committee (TRC)</u>.

**The Center defines screening as follows:** Screening involves brief assessments that are valid, reliable, and evidence-based. They are conducted with all students or targeted groups of students to identify students who are at risk of academic failure and, therefore, likely to need additional or alternative forms of instruction to supplement the conventional general education approach.

## **Chart Features**

- Across the top of the chart are the standards by which the TRC reviews each tool. Click on each standard for a detailed description of how the rating was defined.
- The vendors/developers of the tools have provided implementation information which includes the cost of the tool, what is needed to implement it, the support provided, how the tool is intended to be used, and with whom it should be used. To access this information, click on name of the tool in the "Area" column.
- The ratings in the chart can be clicked on to view the specific data submitted for Classification Accuracy, Generalizability, Reliability, Validity, and Disaggregated Data for Diverse Populations.

The National Center on RTI publishes this tools chart to assist educators and families in becoming informed consumers who can select screening tools that best meet their individual needs.

The Center's Technical Review Committee (TRC) on Screening independently established a set of criteria for evaluating the scientific rigor of screening tools. The TRC rated each submitted tool against these criteria but did not compare it to other tools on the chart. The presence of a particular tool on the chart does not constitute endorsement and should not be viewed as a recommendation from either the TRC on Screening or the National Center on RTI.

Please note that all submissions to the TRC review process were voluntary. An individual, firm, or other vendor whose tool appears on the chart chose to submit its tool for TRC review and then to have its tool and TRC ratings displayed on the chart. The National Center on RTI does not publish the names of individuals, firms, or other vendors who submit tools for review but decide against having the results included on the tools chart.

The National Center on RTI will issue another review of available reading and math screening tools in spring 2010.
